

Adaptor for Wheel changing activity during en-route attention - Chennai Division - June 2018

It is a user friendly gadget for easy lifting and rotation of wheel for taking it out from track while wheel changing at en-route. By using this adaptor with Lukas jack, wheel can be easily lifted and rotated for taking it out from track while wheel changing at enroute. At present for moving the wheel from track, six staff are required and by using this Adaptor, three staff can do the same job.
